## CHEMICAL PEELS

### Peel Tech Fractional Peeling

Give your skin a glow, even out your complexion & diminish acne marks. Ideal for lack lustre skin to smooth & soften, diminish fine lines & even out pigmentation.

A professional peeling system that combines safety and innovation, whilst delivering superior visible results.

Peel tech is a unique fractional peeling system incorporating the latest cosmeceutical formulations and up to date ingredients to give a prescriptive peel. Gives a controllable exfoliation without the visible aggressive skin peeling.

#### OPTION 1 Mini Tech -

Increases elasticity and skin tone. Increases brightness, and it is safe, less aggressive soft peel. Continuous and non-invasive cutaneous renewal, with an antioxidant and moisturising action.

#### OPTION 2 Maxi Tech -

Intensive Peeling, Perfect for a pigmented or sun damaged skin. Reduces the appearance of open pores.

#### OPTION 3 Uptech -

Incisive peeling, beneficial for thicker skin and/or skin with small and thin scars or wrinkles. Leaves the skin feeling smoother and lifted.

The aim of this treatment is to uniformly exfoliate, hydrate & plump up the skin, tightening the pores.

A course of 4 treatments is recommended at weekly intervals.
