Beauty and Aesthetics Centre

.... for your Hair Removal

Waxing

Waxing is a method of semi-permanent hair removal, which removes the hair from its root. New hairs will not grow back for two to six weeks. When the new hair grows back it will feel fine as a new hair has a pointed tip on it so it will feel soft, opposed to the harsh stubble re-growth when shaving which cuts the hair off at skin level only. Almost any area of the body can be waxed, including eyebrows, face, bikini area, legs, arms, back, abdomen and feet. There are many types of waxing suitable for removing unwanted hair. If waxing is done regularly for several years, permanent hair reduction may be achieved.

We specialise in Female Extreme Waxing. Brazilian and Hollywood bikini line waxing.

Our therapists have qualified in Advanced Waxing, trained by Kim Lawless, 'The Wax Queen'. She is the leading authority in the UK and she has developed her own waxing techniques, which are now copied worldwide.

To reduce any discomfort, we use the most superior wax on the market today by world renowned Perron Rigot, Paris.

Electrolysis

Electrolysis has the longest known track record together with the most effective results for hair removal. Dr Charles Michel first used it successfully in 1875 to remove ingrown eyelashes. He discovered that once the follicle had been treated with electrolysis the hair was permanently destroyed.

Electrolysis (Epilation) works by passing a small amount of energy into the hair follicle through a very fine needle. This produces heat which destroys the cells that produce the hair at the base of the follicle. More than one treatment will be necessary due to the fact that hair follicles have a specific hair growth cycle.

We use the Sterex Blend method of hair removal, which combines the benefits of both galvanic and shortwave diathermy methods.

IPL Treatments – Permanent Hair Reduction

Why live with unwanted hair?

If you think all IPL & Laser hair removal treatments are the same, THINK AGAIN! At Preens Beauty & Aesthetics Centre we have invested in Dual IPL & Nd Yag Laser equipment which means we can treat your hair growth in a faster, more targeted & precise method than a single system machine.

Using High Energy Light Pulses this safe system destroys the follicles ability to regenerate unwanted facial and body hair.

Laser and Intense Pulsed Light treatments offer a safe, long-term solution to unwanted, excess hair for both men & women. The treatment is suitable for the face and body, is quick and results can be seen after just a few sessions.
